

175 YEARS OF LOVING CONNECTIONS

Plant a Beech-Family Tree & Share your Family's Love Story

A diverse tree canopy, just like a diverse community, grows strong for generations to come. Here are the families of trees that have been carefully selected by each neighborhood location to commemorate Beech Acres momentous 175th Anniversary.

When you choose a public-space location, you will be able to select the specific variety of your liking.

If you are purchasing a tree for a private location, we will work directly with you to select from across the Beech-Family Tree offerings.

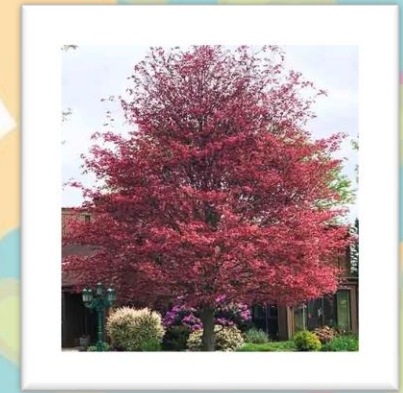

BIRCH

OAKS

HORNBEAM

BEECH

Some things to know:

- ▶ You can **personalize a metal tag attached to the tree trunk** with a dedication (a total of 145 characters, including spaces; they will appear spread across three lines).
- ▶ We will also be creating an **online catalog of family's love stories**, if you'd like to share yours (up to 200 words & two photos).
- ▶ The mature trees are the highest quality sourced from local nursery Natorp's, and will range in height from **8-15 feet tall**, depending on the variety; they are destined to grow into towering shade trees over decades to come.
- ▶ The optimal planting season begins in the fall so our trees will take root in their new homes sometime during **fall '24**.
- ▶ If you are **purchasing a tree for a personal location** such as your own backyard or a neighborhood school, we will work with you to ensure proper planting and long-term care instructions.
- ▶ All trees are **guaranteed for replacement for one year** if they should die for any reason.
- ▶ Beech Acres is a 501(c)3 and a portion of your tree purchase will be **tax deductible**.

All trees are planted in partnership with Taking Root, a local non-profit dedicated to increasing and protecting our unique tree canopy in an eight-county region.
