

**MY DOCTORS CAN  
NOW SHARE MY  
MEDICAL RECORDS  
ELECTRONICALLY!**

### **Automatic Consent**

*You are automatically enrolled in the Health Information Exchange so your medical records can be electronically shared among your doctors. You can opt out of this exchange by filling out the front page of this document.*

### **Important Information for Doctors**

*Sharing records electronically is a simple, fast way for your healthcare provider to get a “whole” picture of your health in one record, no matter where you have been treated in Ohio.*

### **Saving Time and Lives**

*This is especially important in an emergency, when you may be unconscious or unable to speak. Your doctor can save time and even your life when your medical history is right there.*

### **Improved Patient Safety**

*If you’re away from home and in Ohio when you get sick, clinicians can view what medical problems you have and see any allergies you might have. This improves your care and your safety.*

### **Quicker Results**

*When your doctor orders tests, the health information exchange quickly sends those results in real time. Your physician also can get the most up-to-date and accurate information from others who have treated you.*

### **Privacy and Security**

*Only doctors and staff who treat you can look at your health information. Your records remain private in a secure network that is audited.*
